WOUTER NOLTEN
Backend Web Developer

📍 THE HAGUE, SOUTH HOLLAND ✉ INFO@WOUTERNOLTEN.NL

in LINKEDIN.COM/IN/WOUTERNOLTEN/

SUMMARY

Always-positive senior web developer helping everyone to get the best out of themselves. Diving into the challenges companies face and look for the best solutions, together with my colleagues. Building systems that are easy to maintain, work fast and are reliable. Through code, I convert the wishes of the customer into practical solutions. I'm open for work as a freelance backend web developer in PHP, as well as Typescript.

SKILLS

PHP

Symfony, Laravel

TYPESCRIPT / JAVASCRIPT

Node.js, Vanilla, React, Angular, Vue.js

AWS SERVICES

Lambda, EC2, Aurora MySQL, DynamoDB

STORAGE

MySQL, NoSQL, Redis

WORKING METHODS

Agile / scrum, Git, event-driven development, DDD, TDD

CI/CD

Docker, Teamcity, Jenkins

WORK EXPERIENCE

SENIOR BACKEND DEVELOPER
COOLBLUE
JANUARY 2020 - PRESENT

Going the extra mile for a big smile is the target of the company, but was also my goal as a developer. Striving for optimal solutions in the backend of customer-facing parts of the company, varying from cross-sell to services. In the meantime quickly growing to the senior role.

A couple of achievements:

- Developed a complete refactor of installation services. We migrated from REST-based system to an event-sourced system, lowering load times by 50% and raising year-over-year income from services by 5% by showing the right services for the right customer.
- Implemented a page specific for cross-sell, raising customer awareness and income for the company.
- Migrated linking accessories from a monolith into it's own microservices, using less resources for the company, lowering load time and raising conversion rates of customers.

MEDIOR FULL-STACK DEVELOPER
VERVE
MAY 2019 - NOVEMBER 2019

Verve is an international award-winning Dutch design agency. For Verve, I helped to create various award-winning websites in Laravel, like the Dutch Design Week in Eindhoven.

JUNIOR FRONTEND SOFTWARE DEVELOPER
OGD
MAY 2018 - APRIL 2019

During my time as a software developer at OGD, I got seconded to Nexus Netherlands. This company aims to digitalise care to help prevent injuries and even deaths.

During my time there, I implemented a digital protocol by handling SOAP transactions between health care providers and hospitals in order to improve medication safety.

SENIOR SKILLED HELPDESK ENGINEER
OGD
MARCH 2017 - MAY 2018

My career in IT began at OGD, a secondment agency. I quickly grew into the role of senior skilled helpdesk engineer, running the day-to-day IT infrastructure for various clients.

BAND COMPETITION ORGANISER
EMERGENZA
FEBRUARY 2010 - FEBRUARY 2017

Emergenza is an international band competition. I started here during my studies as a simple stagehand but in the end organised the whole Dutch part of the competition. This involved communicating with both bands and venues, selling tickets, taking care of promotion and making sure every evening ran smoothly every night.

EDUCATION

MEDIA ENTERTAINMENT MANAGEMENT
INHOLLAND
AUGUST 2009 - MAY 2013

Mainly focussed on event management, by helping organise diverse festivals and parts of festivals.

LANGUAGES

Dutch - mother's tongue

English - professional for 5+ years
